Abdominal ultrasound PKD screening form

Patient information:

Name: Januschka van Antouch Biffidate
(dd-mm-yyyy): 28-11-2019
Breed:Siberian
Sex: female
Weight: 4.75 kg
Transpondemr.: 528257000104622
Pedigree nr.: (NL) FE LO 19.SIB.026.1

Owner's information:

Name: G. Smaling

Physical examination:

Both kidneys evaluated in awake cat, no abnormalities on abdominal palpation. Smooth, regular surface, equal size.

Echografic findings:

Equipment used: Samsung RS80 EVO, with a microconvex transducer, frequency 4-9 Mhz and linear transducer, frequency 3-12 Mhz.

Both kidneys have a normal shape and size. The structure was normal (cortex/medulla) and no cysts were visible.

Conclusion:

In the cat described above, no signs for the presence of Polycystic Kidney Disease (PKD) were present.
